

Winning Plays in Technology (Oct. 12, 2011)

Recently, Kindergarten scholars were caught going on a campus field trip for a shape “hunt” in the school environment. As the four basic shapes were discovered, digital pictures were taken and used later in the week for sorting, categorizing and creative thinking activities. Great idea!

Kimberly Hayes has also had her scholars using digital cameras to take photos and make short videos as they learn about the various parts of speech. This is an engaging way to learn this content! Thank you, Mrs. Hayes.

Mandy Coburn created a Voki to summarize and communicate the key points in life skills training for Cannon scholars. She reports that she had their FULL attention due to this tech tool.
