

Key Issues: Texas School Funding

Make Education A Priority!

Please consider the following:

- 1) **Preserve education funding.** Funding equals programs for students, which equals teachers and support staff.
- 2) **Give local control over local dollars.** Any voter-ratified taxes should remain in the district \$-for-\$, or at least be subject to recapture at the same rate as Tier I Funds.
- 3) **Eliminate inequities in the funding formula.** Target revenue has created vast inequities in state funding from district to district. The system should provide proper funding for districts to meet expectations of their communities.

Dear Texas Lawmaker,
I am a constituent in your district. You represent my interests as well as the interests of my school district, Grapevine-Colleyville ISD. I realize that the state is facing a \$27 billion shortfall, but the education of Texas students today will have a direct impact on the future of our state and should be your priority. I can see that you have a difficult task ahead and I thank you for your work to **Make Education A Priority** in the 2011 Legislative Session.
